

## HERO Research Meeting

The HERO Research Meeting is an important step in guiding HERO's research priorities and informing HERO's [Research Agenda](#). HERO members meet annually at the Research Meeting to review key health and well-being research activities completed over the preceding twelve months, discuss emerging industry trends, and share their thoughts on important research topics that should be studied in the future.

Participation in the HERO Research Meeting allows you and your organization to learn about the latest industry research, network with other HERO members who are passionate about research and evaluation, and shape HERO's Research Agenda for the following year.

The Research Meeting is a members only event and occurs annually, typically in mid-July, and meets in the Twin Cities Metropolitan Area of Minnesota with convenient access to the international airport.

### 2016 Meeting Information

#### **2016 HERO Research Meeting (members only event)**

July 19, 2016

Hilton Hotel – Minneapolis/Bloomington

Bloomington, MN

HERO [Research Committee](#) members provide strategic direction, research oversight, and subject matter expertise to inform HERO's Research Agenda and ongoing research projects. The annual Research Meeting includes updates on HERO [research studies](#) and solicits member input on the need for new research to inform industry best practices.
